

## Moly Lithium #2

Lithium Moly #2 is a smooth, moly gray lithium stearate grease. It is formulated with refined petroleum oils and provides good stability under extreme operating conditions.

### Features/Benefits:

---

- Excellent water resistance and water wash-out characteristics
- Molybdenum disulfide is added to reduce friction and wear
- Economical

### Applications/Specifications:

---

This product has found acceptance in automotive, farm, trucking, and industrial applications. This product is not for disc brake wheel bearing usage.

Recommended in both ball and roller anti-friction bearings, as well as conventional sleeve bearings.

Typical Physical Specifications:		
Color	Visual	Moly Gray
Texture	N/A	Smooth
NLGI Grade	NLGI	2
Thickener Type	N/A	Lithium Stearate
Penetration	ASTM D217	265-295
Dropping Point, °F	ASTM D2265	340
