

Rock Drill All Season

Formulated with high viscosity index base stocks, greater adhesion to metal surfaces is achieved through tackiness agents and premium additives. This dual purpose lubricant is designed to lubricate rock drills and other pneumatic equipment. The high EP characteristics of this oil extends the drill life as well also cooling the drill. This oil provides excellent film strength, adhesion and lubricity, as well as rust and corrosion protection. Because of its unique formulation, it will suppress smoke and fog from the tool's exhaust.

Features/Benefits:

- Protection against rust, corrosion and foam
- Solid thermal and oxidative stability
- Extended drill life
- Excellent film strength

Applications/Specifications:

Designed for the following pneumatic equipment, manufactured by Joy, Ingersoll-Rand, Gardner-Denver and Chicago Pneumatic:

- High and low speed drills
- Paving breakers
- Drifters
- Self-propelled drills
- Jackhammers
- Stoppers
- Wagon drills

Typical Physical Specifications:	
ISO Grade	46
API Gravity @ 60° F	29.7
Viscosity Index	95
Viscosity:	
SUS @ 210° F	56
SUS @ 100° F	350
Pour Point, °C (°F)	-34 (-30)
Flash Point, °C (°F)	201 (395)
