

## Non-Detergent Engine Oil

High quality Non-detergent motor oils from United are to be utilized where compounded oils are not required, or in all applications that specify a non-detergent oil. They are blended to provide good wear protection and resistance to oxidation, rust and foaming.

Non-detergent motor oils from United make engine wear a non-issue.

### **Beneficial Features:**

Outstanding features of this oil include:

- 💧 Good oxidation resistance
- 💧 Solid wear protection
- 💧 Excellent rust and corrosion protection
- 💧 Premium foam resistance

### **Application Specifications:**

United Non-detergent motor oils are recommended for use in gasoline engines operated under conditions so mild that the protection provided by compounded oils is not required. They also may be used in certain air compressors and other industrial applications that require a non-detergent oil, such as a GL-1 gear oil, hoist oil, or as a general machine oil.

They are not recommended for use in automotive gasoline engines built after 1963.

United Non-detergent motor oil meets requirements of API Service SA.

### **Product Containers Available:**

- Bulk
- 55 Gallons
- 30 Gallons
- 5 Gallon Pails
- 2/2.5 Gallon

### **Typical Physical Specifications:**
