

United Green Mineral Oil is a mineral oil–based gear lubricant intended for use in steering gears, universal joints, and low-torque industrial gears where API Service Classification GL-1 applies. Use where the OEM recommends all-mineral or non-additive gear oil. United Green Mineral Oil does not contain extreme-pressure additives, but its inherent film strength is suitable for its intended service use.

Features:

- Good antioxidation properties
- Low foaming
- Compatible with other gear oils

Applications:

- API Service Classification GL-1
- Heavy-duty manually operated transmissions and gear boxes
- Spiral bevel and worm axles
- Steering gears, universal joints, and spline shafts
- Enclosed industrial gears and flexible couplings
