

United Mineral Drip Oil is a light-bodied oil developed specifically to lubricate the bearings found in deep well turbine pumps. Deep well pumps designed with vertical shafts have bearings located at regularly spaced intervals along the length of the shaft. Both the pump shaft and bearings are enclosed in a tube with a deep-feed oiler located at the top of the shaft. United Mineral Drip Oil is designed to have good low-temperature fluidity to ensure proper lubrication of the critical lower bearings.

## Features:

---

- Minimum wear because of high lubricity
- Economical
- Premium low-temperature fluidity
- Excellent thermal stability

## TYPICAL SPECIFICATION DATA

UNITED MINERAL DRIP OIL	
Viscosity @ 100°C (cSt)	3.5
Viscosity @ 40°C (cSt)	15.0
Viscosity Index	112
Density (lb/gal)	7.03
Pour Point (°C)	-15
Pour Point (°F)	5
Flash Point (°C)	173
Flash Point (°F)	343

## Product Availability:

---

- 2 x 2.5 Gal
- 5 Gal
- 30 Gal
- 55 Gal
- 265 Gal
